# Lasernet Core 11.3 Beta 1 Released!

2026-11-02 - Alice Petruzzella - Comments (0) - Lasernet News

We are happy to announce that we have released Lasernet Core 11.3 Beta 1!

Note

This is a beta release. The content of these release notes is subject to change until the final release of this software.

This beta release should not be used in production environments.

As this is a beta release, minor issues might exist in the software. Although beta releases are not officially supported, you can submit error reports to Lasernet Support.

Compatibility Warning

The Lasernet Connectors for Microsoft Dynamics 365 are currently not compatible with Lasernet Core 11.3 and earlier releases of Lasernet Core 11. We are working towards launching these two products together, but until then, current customers and partners with the Dynamics 365 connectors should continue to use Lasernet Core 10.

Note

Lasernet Core 11 delivers significant advancements in several key areas.

Because of the underlying architectural changes in Lasernet Core 11, if you are considering upgrading from Lasernet Core 10, we recommend that you:

- Thoroughly review the release notes for this and previous Lasernet Core 11 releases.
- Thoroughly review Lasernet Core 11 documentation.
- Fully test your configuration.
- Reach out to your technical team for support.

This note does not apply to the Lasernet Connectors for Microsoft Dynamics 365, which must continue to use Lasernet Core 10.
